Bring indoor comfort to your porch or patio!

RETRACTABLE SCREENS

What are retractable screens?

Retractable screens are installed on porches, covered patios, or any other outdoor space to provide privacy and to protect against sun, wind, or insects. The innovative screen designs are easy to operate, open and close in seconds, and can be fully customized to fit any space.

More comfort, more outdoor living

Create the ultimate outdoor-living space with SunSetter's new **EasyScreen® Retractable Screens**. With the touch of a button, maximize your comfort so you can spend more time relaxing—outdoors. Simply select the model and ideal level of airflow, solar protection, insect protection, and privacy—and bring the comfort of the indoors outside.

- Block up to 99% of UV rays while enjoying comfortable breezes
- Instant privacy and protection with the touch of a button
- Fully customizable with widths up to 22 ft. for unobstructed views
- Up to 10-year limited warranty
- Two available models: Zipper Track and Cable-Guided systems

Dealer exclusive. Two premium options.

Zipper Track

Enjoy shade, privacy, and insect-protection with our Zipper Track Screen Systems. Our best retractable screen system features commercial-design inspired zip-retention side channels that seal the retractable screen to your home to protect you from the elements and create an insect-proof space while still allowing airflow.

Cable-Guided

Our Cable-Guided Screen System is an economical choice, designed to offer sun protection, privacy, and wind protection. This model is ideal if the architectural design of your home doesn't allow for the installation of side tracks and a complete enclosure isn't necessary.

Choose the screen that's right for you.

Finding the perfect EasyScreen® is simple. The first consideration is whether your home's structure can accommodate a Zipper Track Screen System. This would allow you to seal up your outdoor living space against insects, as well as adding privacy and protection from UV rays. For homes where the Zipper Track system cannot be installed, SunSetter® offers the Cable-Guided Screen System that protects against UV rays and provides privacy. Both systems offer a variety of screen options, allowing you to select a screen with exactly the right openness level for privacy, sun protection, view, and airflow.

No matter which option you select, your EasyScreen Retractable Screen will give you the unmatched quality and smooth operation you've come to expect from every SunSetter product.

Fabric Choices

Top-quality fabrics help to make SunSetter's EasyScreen® Retractable Screens some of the most attractive and durable products available today. A range of options, including the new No-See-Um Plus fabric, allows you to pick a fabric that perfectly fits your needs. You'll find an openness level and material for every situation. Choose from privacy screens, insect screens, and solar screens—each offering a different set of capabilities to increase your comfort so you can get more enjoyment out of your outdoor spaces.

- Durable fabrics for years of worry-free enjoyment
- 5- and 10-year warranties
- Openness levels that offer protection while still maintaining a comfortable airflow

EasyShades™

EXTERIOR SOLAR SHADES

Block the heat, not the view. SunSetter EasyShades stop the sun glare and heat before it can enter your home to keep it cooler without obstructing the view. These innovative solar screens block 85% of the sun from the outside, before it can heat up your home. EasyShades are a sure way to save energy, lower air conditioning bills, and keep your furniture and carpets from fading in the sun. Get your EasyShades today and start enjoying the view without the glare!

Features

- Industry-leading 5-year limited warranty
- Stop sun glare and heat before it enters your home
- Keep your home cooler and save on energy costs
- Operate your shades with motorization, solar power, or manually

Charcoal

EasyShades™: Three Options

EasyShades are available in motorized, solar-powered, and manual configurations. All three are maintenance-free, easy to operate, and roll up perfectly straight every time with the help of cables that guide them. That means no tangles or uneven slats like interior blinds.

1

Motorized

Our Motorized EasyShade simply plugs into any outdoor outlet. You choose if you want the electrical cord on the right or left end of your solar screen—and with one touch of the remote control the shade unrolls up to 7 feet or anywhere in between. The shades feature an industry-leading Somfy® Motor hidden inside for easy remote-control operation.

2

Solar-Powered

The top-selling Solar-Powered EasyShade requires no electricity—perfect anywhere on your home, including upper-story windows where outlets may not be available. The solar panel charges the built-in battery pack throughout the day and stores enough power to operate the shade—even on cloudy days. The Solar-Powered EasyShade features a matching-colored, solar-collection panel attached to the outside of the aluminum housing and an industry-leading Somfy® Motor hidden inside. Battery requires only indirect sunlight, so there's no need for an electrician or extension cords. The perfect solution for window and door exteriors.

3

Manual

These solar shades come with a simple-to-use hand crank and do not require electricity. They are a great value, featuring all the same benefits as our Motorized EasyShade model, but without the motor. When you want to enjoy the sun, the shade retracts securely into its protective aluminum housing.

Our Story

SunSetter believes people are healthier—and happier—when they spend more time outside.

As America's #1 selling awning brand, our mission is to help people enjoy their home's outdoor-living spaces more comfortably with retractable screens, shades, and awnings that easily transform a patio into an outdoor oasis.
